2005SR Entry Door with a Flush Panel,
Self-Rising Hinges, and Replaceable
Sealing System.

Where innovation meets performance

Just another great door to be released by CannonBall into its 2005-Series line. The new 2005SR features state-of-the-art innovation and performance. With its newly designed Self-Rising Hinges and Replaceable Sealing System, it is truly one of a kind. Manufactured from similar 2005-Series components, CannonBall looks to provide a new product to the industry while maintaining its standard efficiency.

FEATURES

- 24-gauge steel skin panel provides stability and resists cracking, splitting, rusting, warping, and twisting.
- Door comes equipped with Self-Rising stainless steel hinges, making for the ultimate seal.
- Rolled edge, 1-3/4" thick panels work well with window lites, most common locksets/deadbolts and other available factory-installed options.
- Jamb is made of durable 16-gauge steel and features a 270 degree silicone extruded seal made for all weather applications.
- Dual bulb top/bottom sweep and weathersealing keeps water out and temperature in.
- Each door panel is fully insulated with environmentally-friendly polyurethane foam.
- Pre-hung for a fast-installation and finish look.
- Lockset locations are supported by a non-collapsible nylon insert.

AVAILABLE WINDOW LITES

- 20 x 24 Alum Non-Insulated Lite
- 20 x 24 Alum Insulated Lite
- 22 x 36 Alum Insulated 1-Lite
- 22 x 36 Alum Insulated 9-Lite
