

SQUARE DOOR TRACK *Systems*

door track systems

SQUARE-TRACK™ *System*

Square track from CannonBall:HNP is designed for flexibility and economy in sliding door systems weighing up to 400 lbs. Suitable for use indoors or out, CannonBall square track can be installed with or without a cover in top mount, face mount, and double-run face mount configurations.

Manufactured from 16 gauge galvanized steel, CannonBall square track is available in length from 8 to 20 feet.

All models of CannonBall square track are compatible with our full family of non-bearing, Delrin bearing and roller bearing trolley hangers.

727977	10
727978	12
714027	14
713935	16
714229	18
713986	20

FNF SQUARE TRACK SYSTEM

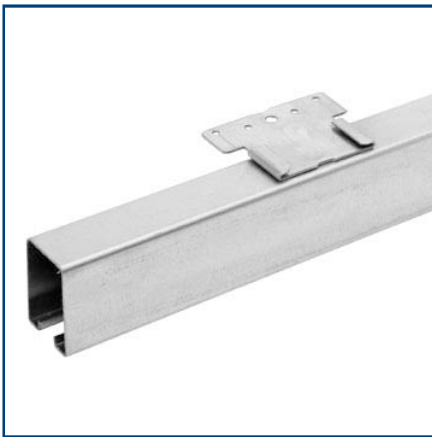

The FNF Square Track System from CannonBall:HNP features a unique bracket design suitable for Flashing or No Flashing applications.

Mounting brackets are pre-riveted to the track for quick and easy installation with no obstructions. A separate flashing bracket can be tapped into slots of the mounting brackets if flashing is needed.

FNF Square Track is made from our standard square track allowing use of all existing CannonBall square track hangers and accessories. Suitable for use on sliding doors weighing up to 400 lbs.

Available in top and face mount configurations in lengths from 8 to 20 feet. The same flashing bracket is used for both top and face mount FNF tracks.

Provides the ease of installation of a snap-on flashing bracket with strength comparable to a one-piece flashing bracket.

SQUARE TRACK W/ TOP MOUNT FNF BRACKETS

TOP MOUNT BRACKET SQUARE TRACK

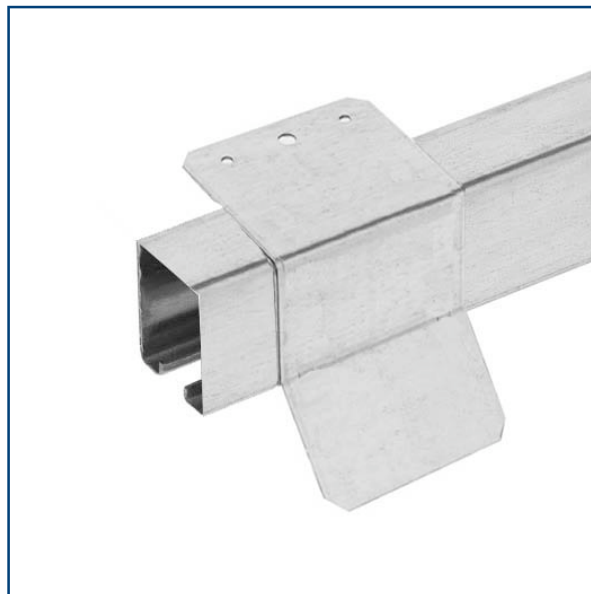

The most popular square track type on the market today, Top Mount Bracket Square Track is strong, durable and easy to install.

Manufactured using our standard square track, Top Mount Bracket Square Track is compatible with all existing CannonBall square track hangers and accessories and is suitable for use on sliding doors weighing up to 400 lbs.

The one-piece, top mount brackets allow for clear access to mounting holes, provide a solid hold point for positioning and handling the track, and cannot be blown apart by high winds.

Top mounts brackets feature a wide design for greater contact between bracket and flashing for maximum strength.

Top Mount Bracket Square Track is available in lengths from 8 to 20 feet.

TOP MOUNT BRACKET SQUARE TRACK	
Part #	Length
714017	8
714018	10
714019	12

WHITE COVER AND GALVANIZED COVER TRACK

Covered Square Track from CannonBall:HNP offers the ultimate in ease of installation – line it up, fasten it, and you’re done.

Heavy duty track cover is pre-riveted to track for maximum strength and fast installation.

Top Mount White Covered Track features a durable, baked-on white finish that accents most building colors – no additional painting required.

Face Mount Galvanized Covered Track can be painted in the field to match any building color, or can be left unpainted if desired.

Manufactured from our standard square track, all covered square tracks are compatible with the full family of CannonBall hangers and accessories, and are suitable for sliding doors weighing up to 400 lbs.

Both track styles are available in lengths from 8 to 20 feet.

door track systems

TROLLEYS

All CannonBall:HNP Square Track Trolley Hangers are designed for use in pairs on sliding doors weighing up to 400 lbs.

Pendant bolt trolleys are suitable for use on all types of sliding doors. A hole is drilled in the top horizontal of the door for attaching the bolt. The offset of the bolt allows for 4-way adjustment of the door.

Easy Adjust trolley hangers feature a straight pendant bolt mounted on a separate adjustment bolt. The pendant bolt provides vertical adjustment while the adjustment bolt is used to adjust the door in or out from the building. Easy Adjust trolleys also feature a removable pin to allow for the trolley to be installed in the track separate from the door – lift the door and reinstall the pin for easy installation.

Strap trolleys are designed for use with wood doors. A variety of straps are available for various door, installation and adjustment options. Straps bolt through the face of the door and attach to the trolley using a modified pendant bolt.

Bolt Thru trolleys are designed for applications where only vertical adjustment is required.

Pendant Bolt Trolley

Easy Adjust Trolley

Strap Trolley

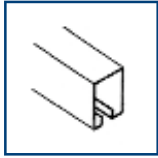

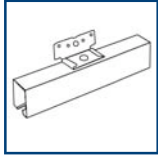

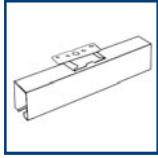

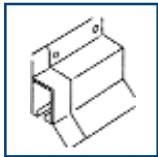

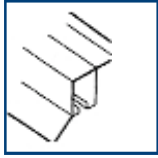

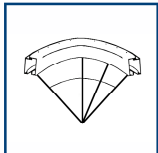

Bolt Thru Trolley

Non-Bearing Trolleys – Economical design with no bearings to wear out over time or fail.

Delrin Bearing Trolleys – Still economical but provides easier and quieter operation of the door.

Roller Bearing Trolleys – Our best trolleys, provide easiest operation and are virtually noise free.

SQUARE TRACK SYSTEMS

	Part No. Description	Ship Wt.	Unit Pkg.
	<p>Plain Square Track. 16 Ga. Galvanized track for making single or double track runs. For doors weighing no more than 400 lbs.</p>	1.7 lbs/ft.	pair
